## MODULE CODES

A Module Code is a five-digit group that describes either the subject area (usually has a zero as a first digit) or license level involved (preceded by two (2) digits indicating the license code). For example 05XXX or 06XXX would indicate Rules of the Road, 07XXX would indicate a generic navigation module. Deck modules that begin with 1 relate to unlimited licenses, those with 2 or 3 relate to limited licenses, a 4 relates unlicensed ratings, and a 9 relates to MODUs. All other modules that begin with 5 through 8 are engineering modules. The third digit is used to denote various things, for instance to identify a geographic area ( $7=$ Great Lakes) or special purpose, i.e., 9 indicates a Renewal Exercise. The fourth (4) digit is used to indicate the year in which the module is generated, i.e.,

07381 indicates a module generated in 1998. The fifth (5) digit represents the version generated in that year, such as modules 25081 and 27002 , 1 and 2 are the respective version numbers. Different versions of the test are used to vary the distribution of questions selected from the subject areas included in a typical module and use of different versions is encouraged.
