Notes:

(1) Individual RECs must develop and administer a Local Knowledge Module to adequately examine the candidate. This will include, but is not limited to, local information questions and a Chart Sketch. RECs shall establish the passing grade for their locally prepared examination material.

(2) This exam is for application for an original license as first class pilot and for an endorsement as first class pilot authorizing service on vessels of not more than 1600 gross registered tons. Applicants for extensions of route and for endorsement as first class pilot on licenses authorizing service on vessels of more than 1600 GRT are only required to successfully complete a local knowledge module and chart sketch for the specific route for which endorsement is sought. (46 CFR 10.707).

(3) Module 073XX does not apply to all routes and may be omitted at the discretion of the OCMI, particularly for routes covering well-defined, limited waterways where vessels do not navigate in the traditional sense. Module 074XX (10 questions, minimum score 90) may be used for routes on River Other Than Western Rivers. Module 075XX (10) questions, minimum score 90) may be used for routes on Western Rivers.

(4) Modules 031XX and 032XX were designed for use with examinations for licenses/endorsements for service on vessels of more than 1,600 GRT in accordance with 46 CFR 10.701 and 15.812. Certain questions may not be applicable in all circumstances. These modules may be modified by deleting inapplicable questions and adjusting the scoring basis.

MODULE CODES

A Module Code is a five-digit group that describes either the subject area (usually has a zero as a first digit) or license level involved (preceded by two (2) digits indicating the license code). For example 05XXX or 06XXX would indicate Rules of the Road, 07XXX would indicate a generic navigation module. Deck modules that begin with 1 relate to unlimited licenses, those with 2 or 3 relate to limited licenses, a 4 relates to unlicensed ratings, and a 9 relates to MODUs. All other modules that begin with 5 through 8 are engineering modules. The third digit is used to denote various things, for instance to identify a geographic area (7 = Great Lakes) or special purpose, i.e., 9 indicates a Renewal Exercise. The fourth (4) digit is used to indicate the year in which the module is generated, i.e., 07381 indicates a module generated in 1998. The fifth (5) digit represents the version generated in that year, such as modules 25081 and 27002, 1 and 2 are the respective version numbers. Different versions of the test are used to vary the distribution of questions selected from the subject areas included in a typical module and use of different versions is encouraged.
